

Greetings from OPPO Mobile

This guide will show you how to use the phone and its important functions. If you need more detailed instruction, please switch on the phone and select "Tools-User manual". You may also visit OPPO official website to get more information about the phone.

Functions of components

1. Front camera;
2. Light sensor&infrared sensor;
3. Volume button;
4. Power button;
5. Menu key
6. Home Key;
7. Return key.

- **Light sensor:** This component will automatically detect the light intensity and adjust the screen brightness according to the light intensity for your convenience.
- **Infrared sensor:** This component will automatically detect the distance between the body and the phone during calls.If the body is close to the phone, the screen will be turned off to avoid enabling other functions.This function is not available when you are calling via earphone and during hands-free mode.
- **Volume button:** This component is used to adjust the volume. The volume will be increased when you press the upper part and decreased when you press the lower part.
- **Power button:** Press the button for a while to switch on/off; Press the button to lock the screen (except for incoming call interface and call interface).
- **Home Key:** Press home key to run the app in background when it is running; Press the key to return to the home screen from other pages.

SAR Values

The highest SAR values under the FCC guidelines for this device model are:

W/kg(Head) and W/kg(Body).

The highest SAR values under the CE guidelines for this device model are:

W/kg(Head) and W/kg(Body).

The highest SAR values under the India national guidelines for this device model are:

W/kg(Head) and W/kg(Body).

Standby and call duration

Duration \ Type	GSM	WCDMA
Standby duration	240 hours	240 hours
Call duration	480 minutes	350 minutes

⚠ Warning: When charging, please place the device in an environment that has a normal room temperature and good ventilation. It is recommended to charge the device in an environment with a temperature that ranges from 0 °C ~35 °C .

Performance parameters

Product name	Mobile phone
Product model	OPPO A51f
Main screen parameters	5.0 inch
Dimension	143.4x71.2x7.65 (mm)
Weight	5.64 ounces (160 grams)
Battery	2420 mAh
Camera	8-Megapixel Rear, 5-Megapixel Front
Operating temperature	-10°C – 45°C

Standard accessories

You are provided with the following standard accessories: 1 Phone, 1 Charger, 1 Earphone, 1 USB data cable, 1 Safety Guide, 1 Quick Guide.

This user manual provides the product safety information. Before using the phone, please read the Important Information Guide (IIG) carefully. OPPO has preinstalled the Quick Guide application and some operational suggestions in your device, please read both carefully.

■ Declaration

OPPO is a trademark or registered trademark of a Guangdong OPPO MobileTelecommunications Corp., Ltd.

© 2010 OPPO. All rights reserved.

This device may contain commodities, technology or software subject to export laws and regulations from Thailand and other countries. Diversion contrary to law is prohibited.

OPPO has a policy of ongoing development. Thus, OPPO reserves the right to make changes or improvements to any of the products described in this document without prior notice.

The contents of this document are all provided "as it is". Except as required by applicable law, no warranties of any kind, either express or implied, are made in relation to the accuracy, reliability or contents of this document.

To the maximum extent permitted by applicable law, under no circumstances shall OPPO or any of its licensors be responsible for any loss of data or income or any special, incidental, consequential or indirect damages howsoever caused.

Product's supplies as well as related application software and accessories might vary areas.

For detail information, please refer to OPPO authorized distributor.

This device may contain commodities, technology or software subject to export laws and regulations from Thailand and other countries. Diversion contrary to law is prohibited.

Safety

Please read the following instructions before using the mobile phone. Without following these instructions it might be dangerous or illegal. Further information about safety are provided by this user manual.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must not accept any interference received, including interference that may cause undesired operation.

Switch on safely

Do not switch on the device when phone use is prohibited or when it may cause interference or danger.

Road safety comes first

Obey and follow all related local laws. Use both hands when driving. Road safety should always come first.

Switch off at gas station

Please do not use phone at gasoline / service stations, places near fuel and chemicals.

Switch off when taking an airplane

Mobile phones might cause interference. Phone use on airplanes is dangerous and prohibited.

Switch off around medical equipment

Hospitals or healthcare organizations might use equipments which are sensitive to radio frequencies. Please follow all the rules and regulations.

Interference

All wireless devices might be susceptible to interference, which could affect performance.

Switch off at blasting area

Please obey all related regulations. Please do not use this device at blasting area.

Appropriate use of the phone

Use the phone only at appropriate places. After switching it on, please do not touch the antenna area if possible.

Qualified service

Only qualified personnel or OPPO technician may install or repair this product.

Accessories and batteries

Please use the exclusive accessories and batteries approved by OPPO. Accessories which are not approved by OPPO may damage the phone and cause danger.

Water-resistance

The device is not water-resistant. Please keep it dry.

Connect with other devices

When connecting with other devices, please read this user manual to learn more detailed and accurate and safety instructions. Do not connect with incompatible products.

■ **Battery precautions in use**

- ▶ Please do not weld battery terminals. Otherwise, it may cause battery leakage, overheat, explosion and fire.
- ▶ Please do not press or pierce the battery with hard objects (for example needle or other sharp objects), to avoid damage, battery leak, overheating or fire.
- ▶ Battery liquid may be harmful if contacted with skin or clothes, your skin might be hurt. Please immediately wash it with water, or go to hospital at once to seek medical help if necessary.
- ▶ If there are any abnormalities like high temperature, discoloration, distortion, bulging, leakage, etc. during operation, charging or preservation, please cease to use the device.
- ▶ Do not expose the battery liquid to eyes. It might cause potential blindness. When happens, wash your eyes immediately or go to the hospital if serious.
- ▶ Do not disassemble or modify the battery, as it may cause battery leakage, overheating, explosion or fire.
- ▶ Do not place or use the battery near fire, heater or other high temperature places. Otherwise, it may cause battery leakage, overheat, explosion or fire.
- ▶ If there is battery leakage or strange smell, please immediately move it from open flame in order to avoid fire or explosion.

- ▶ Please keep the battery away from moist or wet areas from moisture. Otherwise, it may cause battery overheat, fuming and corrosion.
- ▶ Do not place the battery directly in sunlight, or other high temperature areas. Otherwise, battery leakage and overheating may make battery performance descend and service life affected. Keep the battery in a well-ventilated area.
- ▶ Do not use the battery or connect it a high-voltage power supply, otherwise it may cause a short circuit or burst.
- ▶ The battery can be charged and discharged hundreds of times at least, but it will eventually wear out.
- ▶ Do not dispose the battery as household waste. Dispose of the battery according to local regulations.
- ▶ Caution: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

 **Warning:** Please do not charge the battery over 12 hours.

 **To save power and the battery life, please do as follows: extend**

- ▶ Please do not charge or make calls during rainstorm. Please do not place the charger near a container with water in order to avoid charger overheating, electric leakage and other troubles caused by splashing water.

- ▶ If the charger is exposed to water or other liquid, please immediately unplug the power supply from socket in order to avoid overheating, fire, electric shock and charger errors.
- ▶ Please do not disassemble or modify charger, as it may cause personal injury, electric shock, fire and charger damages.
- ▶ Please do not use the charger in moist places, otherwise it may cause short circuit, fire or damage to the charger.
- ▶ Please do not touch the charger, cable and power socket with wet hands, as it may cause electric shock.
- ▶ Do not place heavy objects on power cord or modify cables, as it may cause electric shock or fire.
- ▶ Make sure to hold the charger correctly while unplugging it. Do not pull the power cord as it may get damaged and cause electric shock or fire.
- ▶ Before cleaning the device, please unplug it from the socket first.
- ▶ When using features like Bluetooth and Wi-Fi, it will consume more energy. Please close those functions when they are not in use.
- ▶ The brighter the screen the more battery energy will be consumed; you may lessen the screen brightness and minimize the sleep time in display settings.

■ **Charger precautions in use**

- ▶ Please only use OPPO charger. Please ensure to use only the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.
- ▶ Please use the specified voltages for the given charger. As other voltages may cause leakage or fire. It may also damage your phone and battery.
- ▶ Please do not use an improper plug and outlet, make sure the plug and outlet are appropriate, otherwise it may cause fire.
- ▶ Please do not use short-circuit charger, as it may cause electric shock, fuming or damages for charger.

■ **Do not charge the battery under the following conditions:**

- ▶ Direct exposure to sunlight.
- ▶ Areas with humidity, dust or huge vibration (as troubles might be caused).
- ▶ Areas near TV, radio and other electrical appliances (image or sound effect might be affected).
- ▶ Adapter shall be installed near the equipment and shall be easily accessible.

■ **Driving safely**

- ▶ Safety should always come first when you are driving a car. If you decide to use the phone while driving, make sure to follow related regulations in the area or country.
- ▶ Please do not store or carry your mobile phone and accessories with liquid or inflammable gas. Please always remember the safety airbag in your car will open rapidly in case of an accident so make sure you do not place your phone and accessories on top of them.
- ▶ Electromagnetic waves, the surrounding environment and even the magnets in your earphones will disrupt the accuracy of the compass, so please only use it for reference.
- ▶ If you don't want to disclose your location please do not use apps that can record your location, please obey the rules, law and your local regulations.
- ▶ When searching for location, buildings, directions and distance please do not rely solemnly on the map in your phone, these applications are only for reference purposes. Map, directions and location are provided by service provider, thus information is changing information all the time, and in some places these features are not supported, so map routes and compass may be incorrect, incomplete or unsupported.

■ Operating environment

- ▶ This special regulation shall be observed wherever you are. And you shall switch off the device when phone use is prohibited or when it may cause interference or danger
- ▶ Mobile phones may interfere with normal operations of electronic equipment and medical devices. Please observe related regulations while you are using mobile phones in these areas. Please check your power on/off settings to ensure that your mobile phone would not power on automatically.
- ▶ power on/off settings to ensure that your mobile phone would not power on automatically. Interference from radio wave may cause disoperation or other troubles for electronic equipment.
- ▶ On rare occasions, using the device in some vehicles may affect the electronic devices of the car. On this occasion, please do not use the device to avoid losing security guarantee.
- ▶ When connecting the device or its accessories to other devices, please read the user manual and familiarize yourself with the safety information. Do not connect to incompatible products.
- ▶ When in places of bursting danger, please switch your device off. Do not charge and obey the regulations. If sparks appear in those places it's likely to cause burst or fire. In bursted areas please pay attention to the signs and avoid danger, these places including gas stations, the bottom of a ship, chemical factory, vehicles using gas, places where in the air there is chemicals and at places vehicles are required to stop.

■ **FCC Statement**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must not accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

■ **FCC Caution:**

- ▶ Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- ▶ The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
- ▶ The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.
- ▶

■ **RF Exposure Information (SAR)**

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

For body worn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and be positioned a minimum of 1.0cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1.0cm from your body when the device is switched on.

- ▶ If you are using pacemaker, hearing aid, cochlear implant or other device, please use the phone according to the doctor's advice.

Additional Important Health and Safety Information

- ▶ Please do not use the phone if antenna is damaged. Otherwise, it may cause personal injury.
- ▶ Do not place the phone near magnetic card and other magnetic objects, as information stored in a floppy disc, memory card and credit card might be damaged by phone's magnetic radiation.
- ▶ Please place drawing pins and other metallic objects far away from phone receiver. As there is magnetic effect/field when the phone speaker works, these small metallic objects may be attracted to the device and personal injury and phone damage may be caused.

- ▶ Avoid the phone to expose in moisture area, water or other liquid, as it may cause overheat, electric leakage and other problems may occur.
- ▶ Do not force the display or use the display to beat other things. Otherwise, it may cause display damage and leakage of the liquid inside the LCD. The liquid of the LCD may cause blindness if it comes in contact with your eyes. If that happens, flush your eyes with water immediately (do not rub your eyes) and go to hospital for help.
- ▶ Do not disassemble or modify the phone. Otherwise, it may cause phone damage, electric leakages and circuit troubles.
- ▶ Your phone can only use OPPO authorized batteries and chargers. Using other products may cause battery leakages, overheating or fire. OPPO will not take any responsibility for accidents or problems caused by using accessories that are not approved by OPPO.
- ▶ Due to the used of enclosure material, the mobile phone shall only be connected to a USB Interface of version 2.0 or higher. The connection to so called power USB is prohibited.

Excessive sound pressure from earphones and headphones can cause hearing loss.

This Headset should only be used on this mobile phone.

■ All other equipment shall

- a) Protect the user from unintentional acoustic outputs exceeding those mentioned above;
- b) Have a standard acoustic output level not exceeding those mentioned above, and automatically return to an output level not exceeding those mentioned above when the power is switched off;
- c) Provide a means to actively inform the user of the increased sound pressure when the equipment is operated with an acoustic output exceeding those mentioned above. Any means used shall be acknowledged by the user before activating a mode of operation which allows for an acoustic output exceeding those mentioned above. The acknowledgement does not need to be repeated more than once every 20 h of cumulative listening time;
- d) Have a warning as specified in Zx.3;
- e) Not exceed the following:
 - 1) Equipment provided as a package(player with its listening device), the acoustic output shall be \leq 100 dBA ,measured while playing the fixed "programme simulation noise" described in EN 50332-1;
 - 2) A personal music player provided with an analogue electrical output socket for a listening device, the electrical output shall be \leq 150mV measured as described in EN 50332-2, while playing the fixed " programme simulation noise" described in EN 50332-1.

■ Care and Maintenance

- ▶ Your phone is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you observe warranty terms and prolong the life of the device.
- ▶ If the screen comes in contact with liquid, metal dust or other objects, please clean immediately.
- ▶ Please do not touch the connection port of the phone, because static electricity may harm the components in the device.
- ▶ Do not knock, shake or drop the phone to avoid troubles or fire.
- ▶ Please do not press or twist the device (for example sit on it, put it in your back pocket or twist it), if you twist it too hard., it may break the screen or the device.
- ▶ Please do not hit or scratch the screen with sharp objects; please do not place heavy objects on the screen, or press any point on the screen for too long.
- ▶ Do not place the battery, phone or charger in micro-wave oven or high voltage equipment. Otherwise, it may cause circuit damage, fire and other accidents.
- ▶ Do not use the phone around flammable, explosive gas as it may cause phone damage and fire.

- ▶ Do not place the phone in areas with high temperature, high humidity and lots of dust as it may damage the device.
- ▶ Please keep the phone out of the reach of children, in order to protect them from causing injuries.
- ▶ Do not place the phone on uneven or unstable table to avoid dropping the device.
- ▶ Your phone, battery and charger are not waterproof, please do not use it in bathroom or other humid area and avoid contact with rain.
- ▶ Avoid using special adhesive protectors as the glue may cause damage to the painting.
- ▶ Do not paint the phone. Paint may clog the moving parts and may cause the phone disoperation.
- ▶ Use soft clean and dry to clean the phone, battery and charger.
- ▶ Do not use ethanol, thinner agent or benzene, etc. to clean the phone. If there is oil, stain or other dirt that cannot be easily please use tissue or soft cloth with water to clean it, do not use removed, your fingernails or knife to avoid scratching the screen.
- ▶ Dirt in the socket may cause poor contact or connection with the charger and your phone may power down without charging. Regularly clean the power socket.

- ▶ When the phone is transmitting or saving info, please do not uninstall the SIM card, otherwise you may lose some important information or harm your device.
- ▶ Use only the supplied or approved replacement antenna. Modified accessories may damage the phone or violate administer regulations of radio devices.
- ▶ This device only supports a standard Micro SIM card, using non-standard SIM card may harm the device.
- ▶

 **Warning:** Before using the phone, please read these health and safety information carefully. Some people may get dizzy or convulsion when seeing flashing lights for example lights from playing games or watching videos, if you have this kind of symptoms please consult your doctor.

EU Regulatory Conformance

Hereby, Guangdong OPPO Mobile Telecommunications Corp., Ltd. declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Notice: Observe the national local regulations in the location where the device is to be used. This device may be restricted for use in some or all member states of the European Union (EU).

The SAR limit of USA (FCC) is 1.6 W/Kg averaged over one gram of tissue. Device types OPPO A51f (FCC ID: R9C-A51F) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification for use when properly worn on the body is 0.728 W/Kg and for head is 0.512 W/Kg. Simultaneous RF exposure is 1.502W/Kg.
